MARSH
MOYAR

READY FOR THE NIGHT FLIGHT « «

The Boeing Air Transport, Inc. uses a Fifteen at the Oakland Terminal (California) to spot a big 12 passenger, tri-motored plane for the night run toward the East.

EAGERNESS...

THAT early morning enthusiasm for the day's work...that desire to be "doing something" born of good health and a sound constitution...that pleasure in winning victories over the new and difficult that betokens a stout heart and willing muscle...that briskness in moving around...all these reveal **eagerness** in driver and tractor alike.

And that's why a clever operator feels so much at home in the cushioned seat of a "Caterpillar" Tractor!

Caterpillar Tractor Co.

Executive Offices: San Leandro, California, U. S. A.

Sales Offices:

Peoria, Illinois San Leandro, California

Factories:

Peoria, Ill. Minneapolis, Minn. Stockton and San Leandro, Calif.

Products:

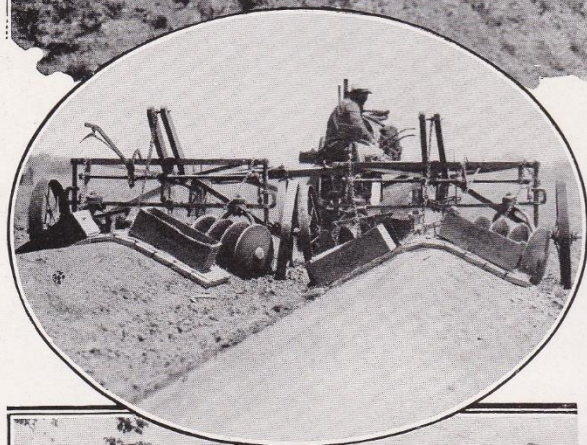

"Caterpillar" Combines "Caterpillar" Road Machinery
"Caterpillar" track-type Tractors

STRAIGHT AS AN ARROW • •

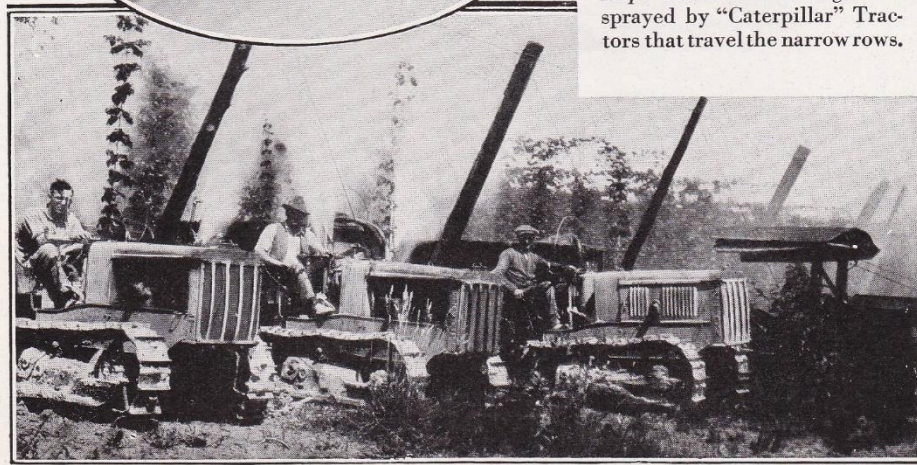

Sixteen rows at one trip...here is an example of *sugar beet* cultivation on a wholesale scale.

(Oval)

Asparagus ridges are thrown up, rounded off and smoothed by "Caterpillar" power.

Hops fourteen feet high are sprayed by "Caterpillar" Tractors that travel the narrow rows.

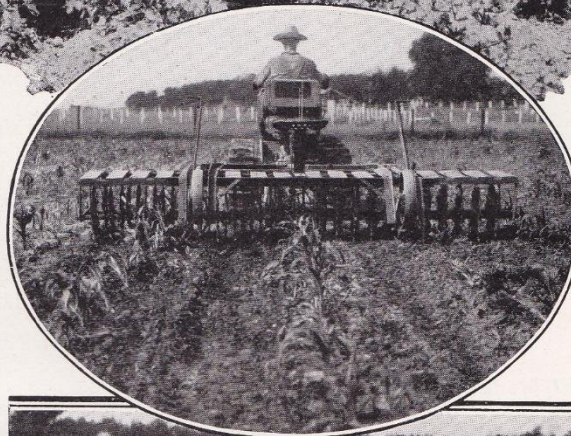

• • • DOWN THE ROW!

Five rows of cotton are cultivated with a "Caterpillar" Thirty Tractor... plenty of power eats up the acreage.

(Oval)

The rotary hoe rides through corn 15 inches high... no damage even in high gear.

Nearly five miles an hour through *soy beans*... the weeds haven't a chance. Sure traction even on soft soil... positive steering in narrow rows... the "Caterpillar" is the weeds' worst enemy!

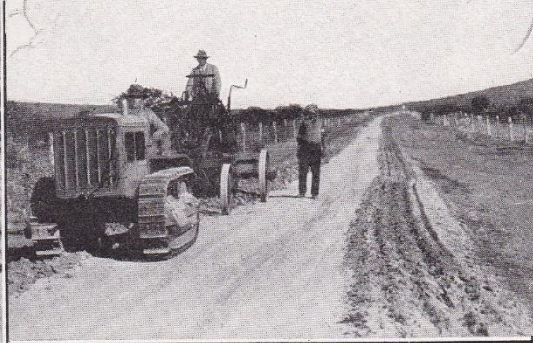

GET OUT YOUR GEOGRAPHY ~

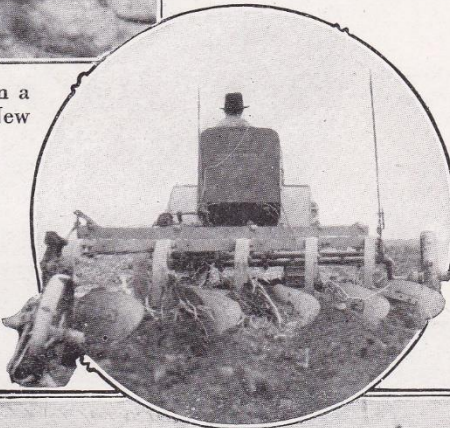

A four-ton log down a 1 to 6 grade at Elands, New South Wales.

Near Port Elizabeth, South Africa, the "Caterpillar" Tractor brings wider, safer, faster roads.

Right: The Twenty pulls five 14-inch plows seven inches deep ... Hacienda Montalvan, Cañete, Peru.

Below: Santiago de Cuba profits from better streets...thanks to the "Caterpillar" Twenty Tractor

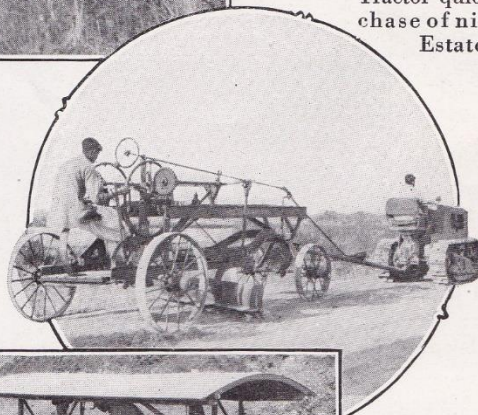

(Above)
A 2½-inch plug, pulled through the ground 20 inches below the surface, makes a mole drain at Palmerston North, New Zealand.

The work of a first "Caterpillar" Twenty Tractor quickly leads to the purchase of nine! Calamba Sugar Estate, Philippine Islands.

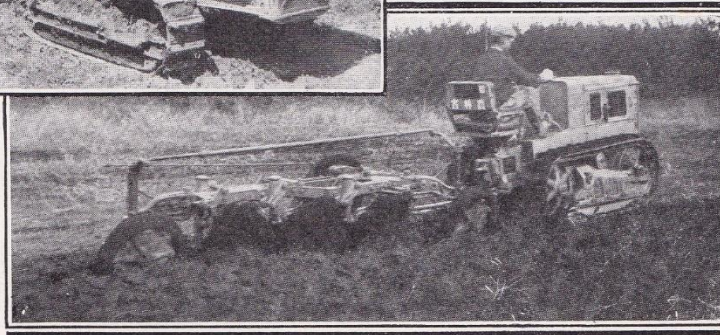

Pulling a "Caterpillar" Grader near Sibsagar, Northern Assam, India.

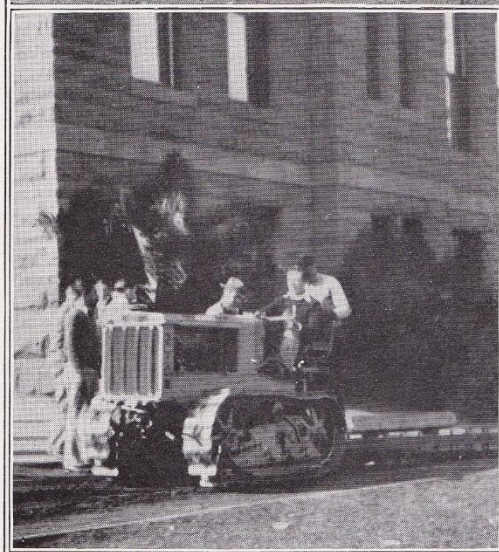

(Left)
A new 16-foot road into Waimea Canyon, on the Island of Kauai... "Caterpillar" built.

e burned.

Then the heavy disk plow once more puts the land in shape to begin anew the cycle of sisal culture.

A "Caterpillar" Tractor Rescues Colesburg

Last winter, for nearly a week, Colesburg, Iowa, was snowed in. Food and fuel were practically gone. There was an S. O. S. call. A "Caterpillar" Sixty Tractor smashed through and tossed aside 14 miles of ice-encrusted drifts. But it won't happen again...the county bought the tractor and snow plow.

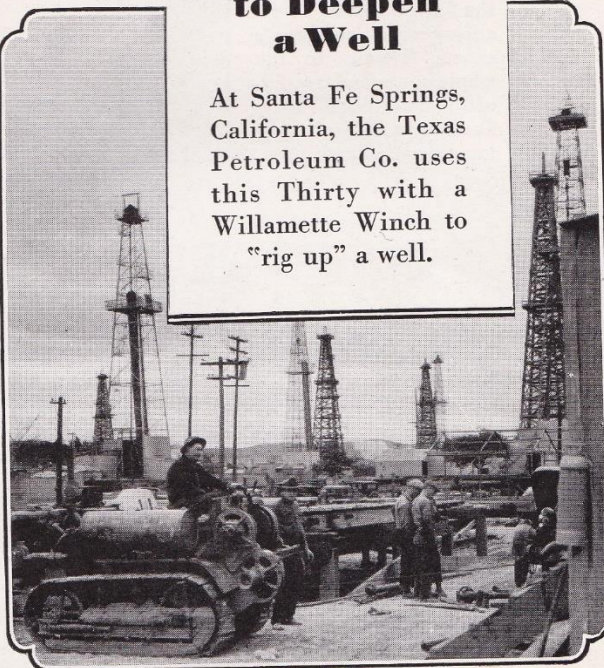

One Mile of Snow Fence

The State Highway Department of Minnesota believes in preparedness...the Snow Bogy can't pile the drifts so deep when snow fence has been wisely placed. And, if the drifts do form, this same "Caterpillar" Tractor, pushing a big plow, will buck the road open again

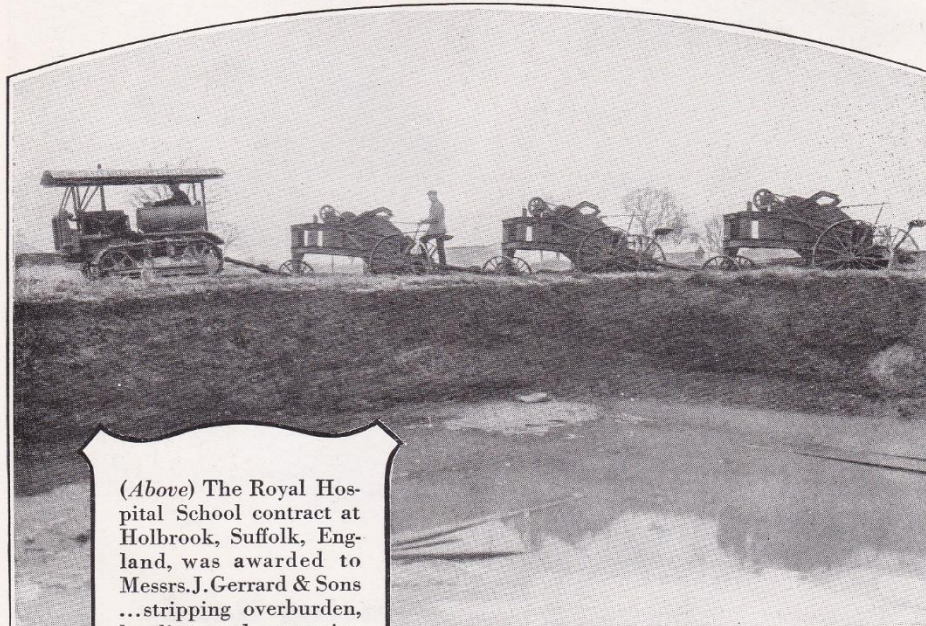

Getting Ready to Deepen a Well

At Santa Fe Springs, California, the Texas Petroleum Co. uses this Thirty with a Willamette Winch to "rig up" a well.

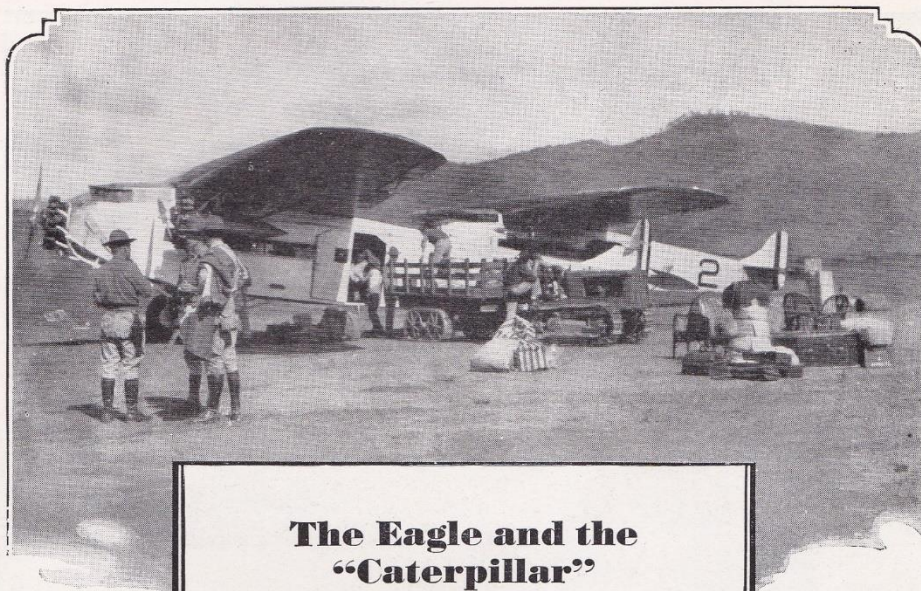

HERE and THERE WITH BAKER-MANEYS

(Above) The Royal Hospital School contract at Holbrook, Suffolk, England, was awarded to Messrs. J. Gerrard & Sons ...stripping overburden, leveling and preparing the foundation for recreation grounds and tennis courts. Thanks to the ample power and traction of the "Caterpillar" Thirty Tractor, work has moved forward at a brisk pace.

(Below) Prison labor on Georgia's roads, when armed with "Caterpillar" Tractors and modern equipment, can accomplish wonders in an amazingly short time.

Tank Sinking in Australia...

Mr. O. H. Heinrich
sends this illustration
from South Australia...
the 17-foot tank will
hold 120,000 English
gallons of water...most
of the work was done
with the "Caterpillar"
Tractor and a
scraper.

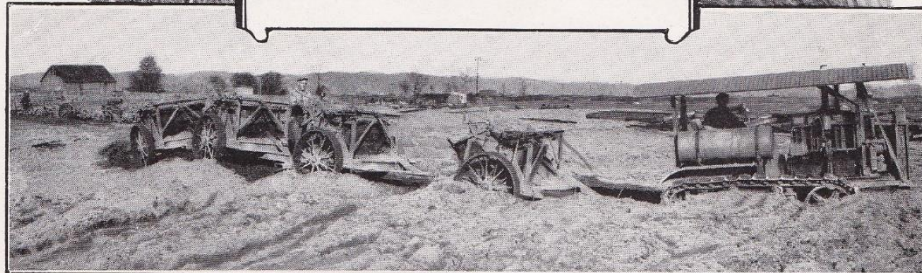

Ginning Cotton at Vicksburg, Mississippi

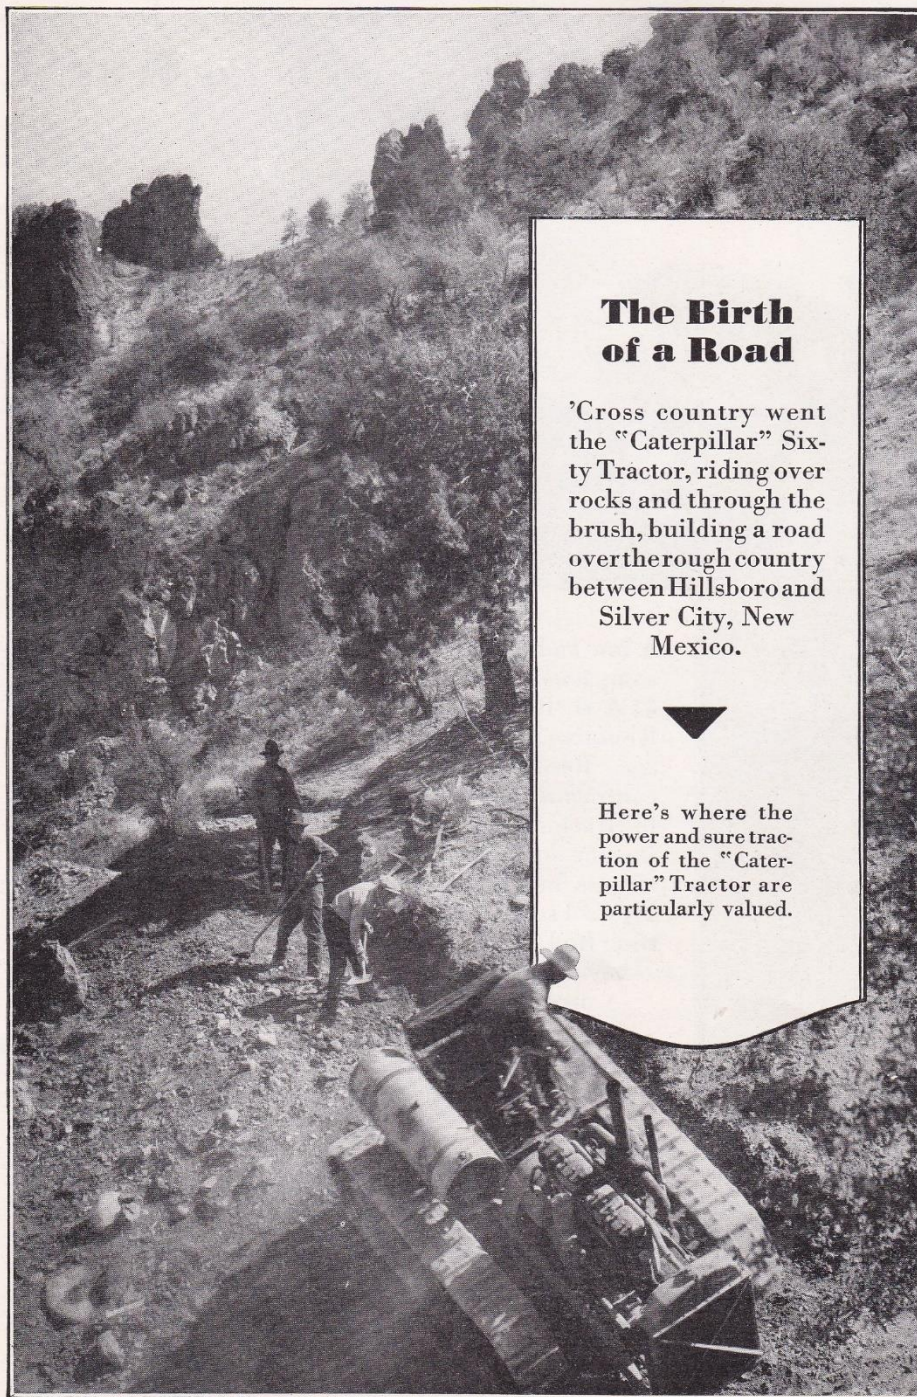

22 bales are being turned out every ten hours...the "Caterpillar" Thirty Tractor is running an 80-saw, 2-stand Munger Gin with press and blower.

"Cochinitas"

Shortly after these two "Caterpillar" Thirty Tractors were delivered by the Beaumont Export & Import Co. to Sr. Silvestre Faya and the Torreon Automobile Club they were commandeered by the Mexican rebel army under the command of José Gonzalo Escobar and were at once converted into tanks, saw active service in Chihuahua... and were dubbed "cochinitas", meaning *little pigs*. Here they are, being returned to Mexico City, ready for the more prosaic tasks of farming and road building.

The Largest Switchyard in the World

The Birth of a Road

'Cross country went the "Caterpillar" Sixty Tractor, riding over rocks and through the brush, building a road over the rough country between Hillsboro and Silver City, New Mexico.

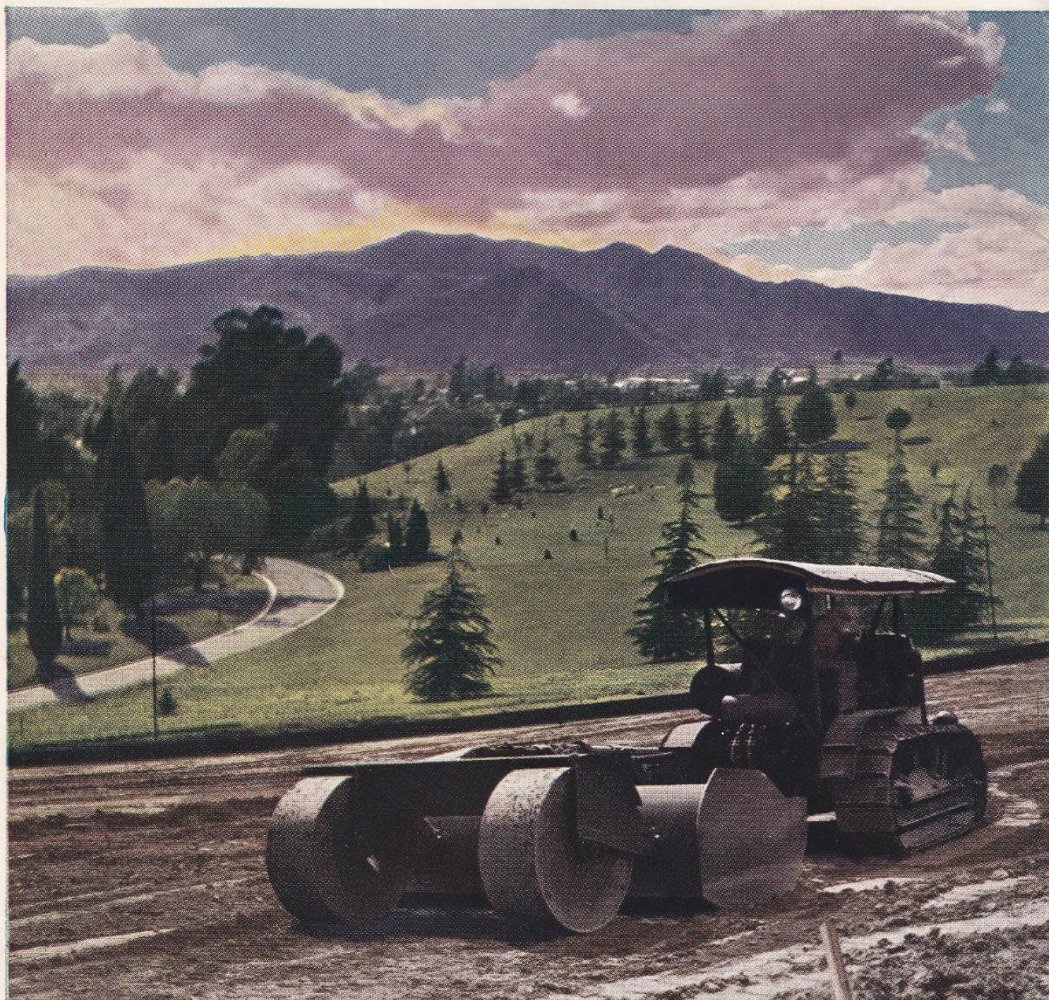

Here's where the power and sure traction of the "Caterpillar" Tractor are particularly valued.

—the «Caterpillar» Tractor and the big snow
plow work their magic on an impassable road—
the countryside throws off Winter's shackles
and goes about its business and pleasure

LANDSCAPING

Makes little difference whether it's a park, cemetery or golf course—leveling and earth moving are jobs that "Caterpillar" Tractors can do
